

Oak Ridge Climate Action Plan

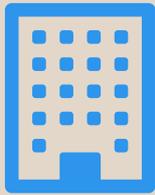

Progress Report through 2012

By 2012, City greenhouse gas (GHG) emissions were 6% below the 2004 baseline, and community emissions were 3% below the baseline year emissions.

If the recent trends continue, both the City and community can meet or exceed GHG emissions reduction goals for 2015.

Specific Achievements

20% reduction in greenhouse gas emissions from City buildings

60% reduction in electricity use for traffic signals by upgrading to LED technology

95 KWh average annual decrease in electricity consumption by households over the last 11 years

TVA leadership award for Green Power Switch participation

AWARDS

Designation as 1st Green Power Community in Southeast by Environmental Protection Agency

NEXT STEPS

Build upon the completed home energy retrofit project as a model for improving energy efficiency of older homes.

Develop data-tracking system for City to monitor progress.
